## Topic 2 - Matrix Multiplication

## Topic 2 - Matrix Multiplication

- Motivation
- Multiplication of Conformible Matrices
- Generalized Description of Multiplication
- Exercise in MATLAB

# Motivation

- Why do we need to multiply matrices?
- Why do we need to use a computer?

# Multiplication of Conformable Matrices

Consider 2 conformable matrices  $F$  and  $G$  with elements  $f_{ij}$  and  $g_{ij}$ .  
Matrix Multiplication gives the product matrix  $E$  with elements  $e_{ij}$ .

$$E = F \times G$$

$$e_{ij} = \sum_{k=1}^n f_{ik} \times g_{kj}$$

$$\begin{bmatrix} e_{11} & e_{12} \\ e_{21} & e_{22} \end{bmatrix} = \begin{bmatrix} f_{11} & f_{12} & f_{13} \\ f_{21} & f_{22} & f_{23} \end{bmatrix} \times \begin{bmatrix} g_{11} & g_{12} \\ g_{21} & g_{22} \\ g_{31} & g_{32} \end{bmatrix}$$

## Generalized Description of Multiplication

$$e_{ij} = \sum_{k=1}^n f_{ik} \times g_{kj}$$

$$\begin{bmatrix} e_{11} & e_{12} \\ e_{21} & e_{22} \end{bmatrix} = \begin{bmatrix} f_{11}g_{11} + f_{12}g_{21} + f_{13}g_{31} & f_{11}g_{12} + f_{12}g_{22} + f_{13}g_{32} \\ f_{21}g_{11} + f_{22}g_{21} + f_{23}g_{31} & f_{21}g_{12} + f_{22}g_{22} + f_{23}g_{32} \end{bmatrix}$$

- What does that equation above mean?
- How can we write a *General Solution Technique* using the equation?

# Generalized Description of Multiplication

## A Programming Exercise - Matrix Multiplication
