

Module 2 - Non Linear Equations

ME3001 - Mechanical Engineering Analysis

Mechanical Engineering
Tennessee Technological University

Topic 3 - The Newton-Raphson Method

Topic 3 - The Newton-Raphson Method

- Analytical vs. Numerical
- A Shooting Method: Graphical Explanation
- Taylor Series Derivation
- A Better Hammer!

Analytical vs. Numerical

Theoretical/Analytical Solution Techniques

- solving the equation using exact mathematics
- leads to an exact or *analytical* solution

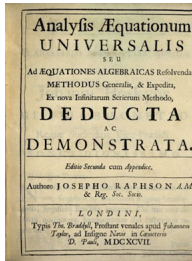

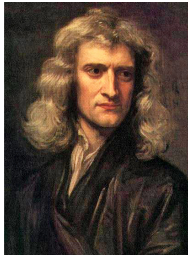

Numerical Solution Techniques

- approximating the solution to the equation using varying methods, or *algorithms*
- leads to a approximate solution
- a.k.a. *Numerical Method*

A Shooting Method: Graphical Explanation

These scientists changed the world forever.

- Isaac Newton, mathematician and physicist, 1642-1727
- Joseph Raphson, English Mathematician, 1648-1715

A Shooting Method: Graphical Explanation

The Newton-Raphson method is a *shooting method*.

Taylor Series Derivation

The method is derived from the Taylor series.

$$f(x) \approx f(a) + f'(a)(x - a) + \frac{f''(a)}{2!}(x - a)^2 + \dots + \frac{f^{(n)}(a)}{n!}(x - a)^{(n)}$$

A Better Hammer!

Now you have much better hammer. However, must be used properly...
